## **Satellite Broadband for European Regions**

The purpose of the SABER Thematic Network is to create a long term, sustainable environment in which stakeholders interested in tackling the Digital Divide by contributing to the roll out and take up of broadband for all, at increasing speeds, and in particular through satellite-based services, can proactively collaborate.

The scope of the SABER Thematic Network is to create the conditions for the most efficient and effective contribution of satellite systems to support the achievement of the objectives set in Europe 2020 and subsequently in the Digital Agenda for Europe (DAE).
