

SABER Kick-off meeting

Bruxelles – 9th November 2012

Sandra Lotti (sandra.lotti@lepida.it)

Kussai Shahin (kussai.shahin@lepida.it)

Lepida SpA

- ▶ In-house company for Emilia-Romagna Regional Government (Italy) and all the local public authorities of the regional territory (**412 shareholders**)
 - established by a Regional Law, and it is **directly involved in the governance of the Regional ICT Plan** which defines the regional ICT strategies and policies

- ▶ Its activities:
 - focused on planning, developing and managing the regional telecommunications networks and services of (and for) the PA
 - develops and supplies IT services to its shareholders, supported by an R&D department.

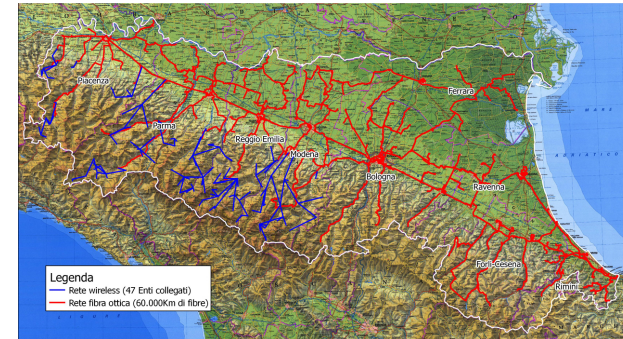

- ▶ Deeply involved in the public strategies on **broadband and ultra broadband networks development** and **anti digital divide programmes**, with a technology neutral approach.

Lepida SpA, regional networks and Digital Agenda

▶ Regional infrastructures and heterogeneous interconnected networks of covering the whole territory

- Regional Area network (Optical fiber)
- Metropolitan Area networks (Optical fiber)
- Regional digital radio network (TETRA)
- Wireless networks (Hyperlan)

▶ Regional strategy to reach the goals of the Digital Agenda for Europe

- the *Regional ICT Plan* is the Regional Digital Agenda
 - Common vision and collaborative approach between all the local PA
- on-going initiatives to reach the 2013 goal (2Mb/s for all)
 - exploiting the asset of the PA, direct actions in terms of new infrastructures and facilities, and collaboration with all the TLC Operators
- on-going experimental models for industrial areas to reach the 2020 goals and involvement of all actors in order to ensure coordinated actions within the regional territory.
